

Title: **The Perils of Urban Consolidation**

Published: August 1996

Author(s): Patrick N Troy AO

Pages 208 pages

Description: In this book, Troy takes full account of the infrastructure, environmental, social justice issues and accommodation needs in urban planning area and offers a fairer, more prudent and environmentally sound alternative to current policies.

This is a provocative and illuminating study that is enhanced by Troy's background in engineering, town planning, public policy, administration and urban research.
